

Contoso Architecture Partners

Northwind Corp — architecture review board packet (sample)

Review ID: a1111111-1111-1111-1111-111111111111

Review (run) ID: northwind-demo-review-run-001

Request ID: req-contoso-northwind-8842

Architecture snapshot version: mv-sample-2026-05

Generated UTC: 2026-05-16T06:45:29.2473504+00:00

Terminology follows buyer-facing glossary: Review ↔ committed run; Architecture snapshot ↔ golden manifest.

Executive summary

Contoso Architecture Partners assessed Northwind Corp's regulated commerce architecture after finalize review of the committed architecture snapshot. The engagement confirms traceable evidence, recorded architecture decisions, and actionable follow-ups suitable for board readout.

System overview (architecture snapshot)

- Architecture snapshot covers «Northwind Corp — regulated commerce platform» with representative services and datastores for the pilot boundary.
- Governance metadata reflects sample risk and compliance posture used only for demonstration.
- Compliance tags and constraints are illustrative — replace with tenant-backed policy packs in production reviews.

Evidence reviewed

Request narrative

Northwind seeks to modernize checkout while preserving PCI isolation boundaries and regional residency commitments.
Reference: SAMPLE-RQ-01

Constraint

EU-West processing for personally identifiable checkout telemetry.

Required capability

Idempotent order intake under partial network partitions.

Architecture decisions

RunEvent

FinalizeReviewGate: Golden manifest validated prior to board packet export (synthetic event).

Recorded: 2026-05-16T14:00:00Z

Key risks

Governance: Architecture snapshot risk classification is High (demo seed).

Illustrative only — customer manifests carry tenant-specific governance.

Analysis warning: Model-assisted finding pending human disposition before sponsor sign-off.

Synthetic warning row for sample layout.

Policy findings

Sample policy constraint #1 — Recorded on architecture snapshot

Encrypt regulated checkout payloads at rest and in transit.

Required control — Required

Break-glass access to production paths requires dual approval.

AI-assisted analysis

Findings requiring human disposition — model-assisted observations are advisory only. ArchLucid does not exercise autonomous authority over production posture.

Model-assisted finding pending human disposition before sponsor sign-off.

Operators should reconcile against evidence graph links before treating as authoritative.

Recommended next actions

1. Validate remediation plans against constraint: Encrypt regulated checkout payloads at rest and in transit.
2. Triage analysis warning: Model-assisted finding pending human disposition before sponsor sign-off.
